

# NATURAL GAS COMPRESSOR STATION AND UNIT DESIGN

Our team has provided design and drafting services for more than 35 grass root compression facilities that included anywhere from 3 to 12 engine driven compressors, including all support utilities, metering and storage.

Matrix PDM provides complete overall multidiscipline design of compressor stations, including all support utilities, metering, and storage.

**A HIGHER STANDARD IN ENGINEERING.**

# UPSTREAM, MIDSTREAM, OR DOWNSTREAM, WE HAVE THE FLEXIBILITY AND EXPERIENCE

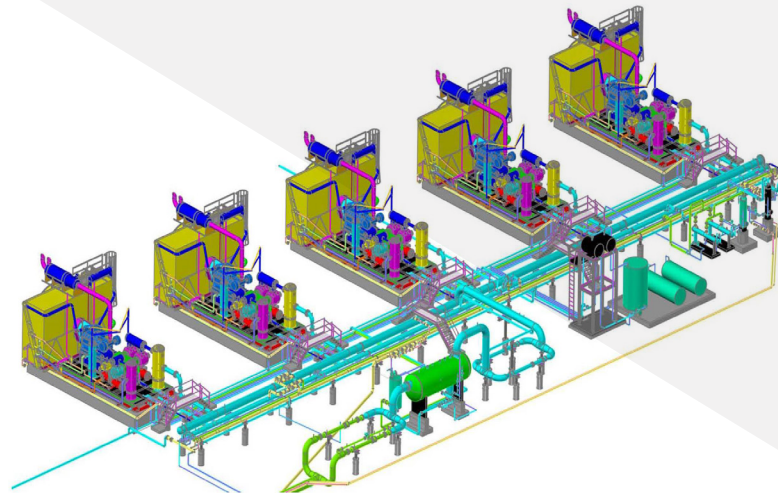

Whether your application is upstream at the well-pad, midstream at your process facility or along your transmission system, we work with you to develop a compression plan and design that yields the performance and flexibility needed for your application.

## Services

- Complete design and layout
- Process, civil, structural, mechanical, electrical and control system design
- Air emissions and noise restriction design
- System and equipment specification and integration
- 3D design

## Partial client list

- Energy Transfer Company
- Samson Energy
- Sandridge
- Southwest Energy
- Superior Pipeline
- Thomas Russell Company
