

Rockies Express Pipeline

CLIENT - Kinder Morgan
LOCATION - Multiple U.S. States
COMPLETED - 2009

DESCRIPTION

Matrix PDM was part of the project team selected to develop, program and commission multiple natural gas compressor stations and units that spanned eight states for the Rockies Express Pipeline.

Matrix PDM Engineering developed the control system standard for the units and stations by leveraging our control system expertise to deliver a packaged control system.

Our turnkey packaged and fully tested control system allowed us to shorten the commissioning process and bring these reliable systems online quickly in a tightly coordinated startup with overall pipeline operations.

WORK SCOPE

- Development of programming standards for one of the largest natural gas pipelines in America
- Rockwell Automation Plant Pax Process Automation System and Allen-Bradley ControlLogix PAC
- Improved efficiency of stations and units
- Implementation of industry standard automation control systems and software
- Automated eight stations and 26 units
- In-house simulation and Factory Acceptance Testing
